

LIFELINK HUB HEALTHCARE APP

Created by: GROUP B2

AGENDA

- Introduction
- Target Audience
- Features
- Designing and Developing
- Challenges

INTRODUCTION

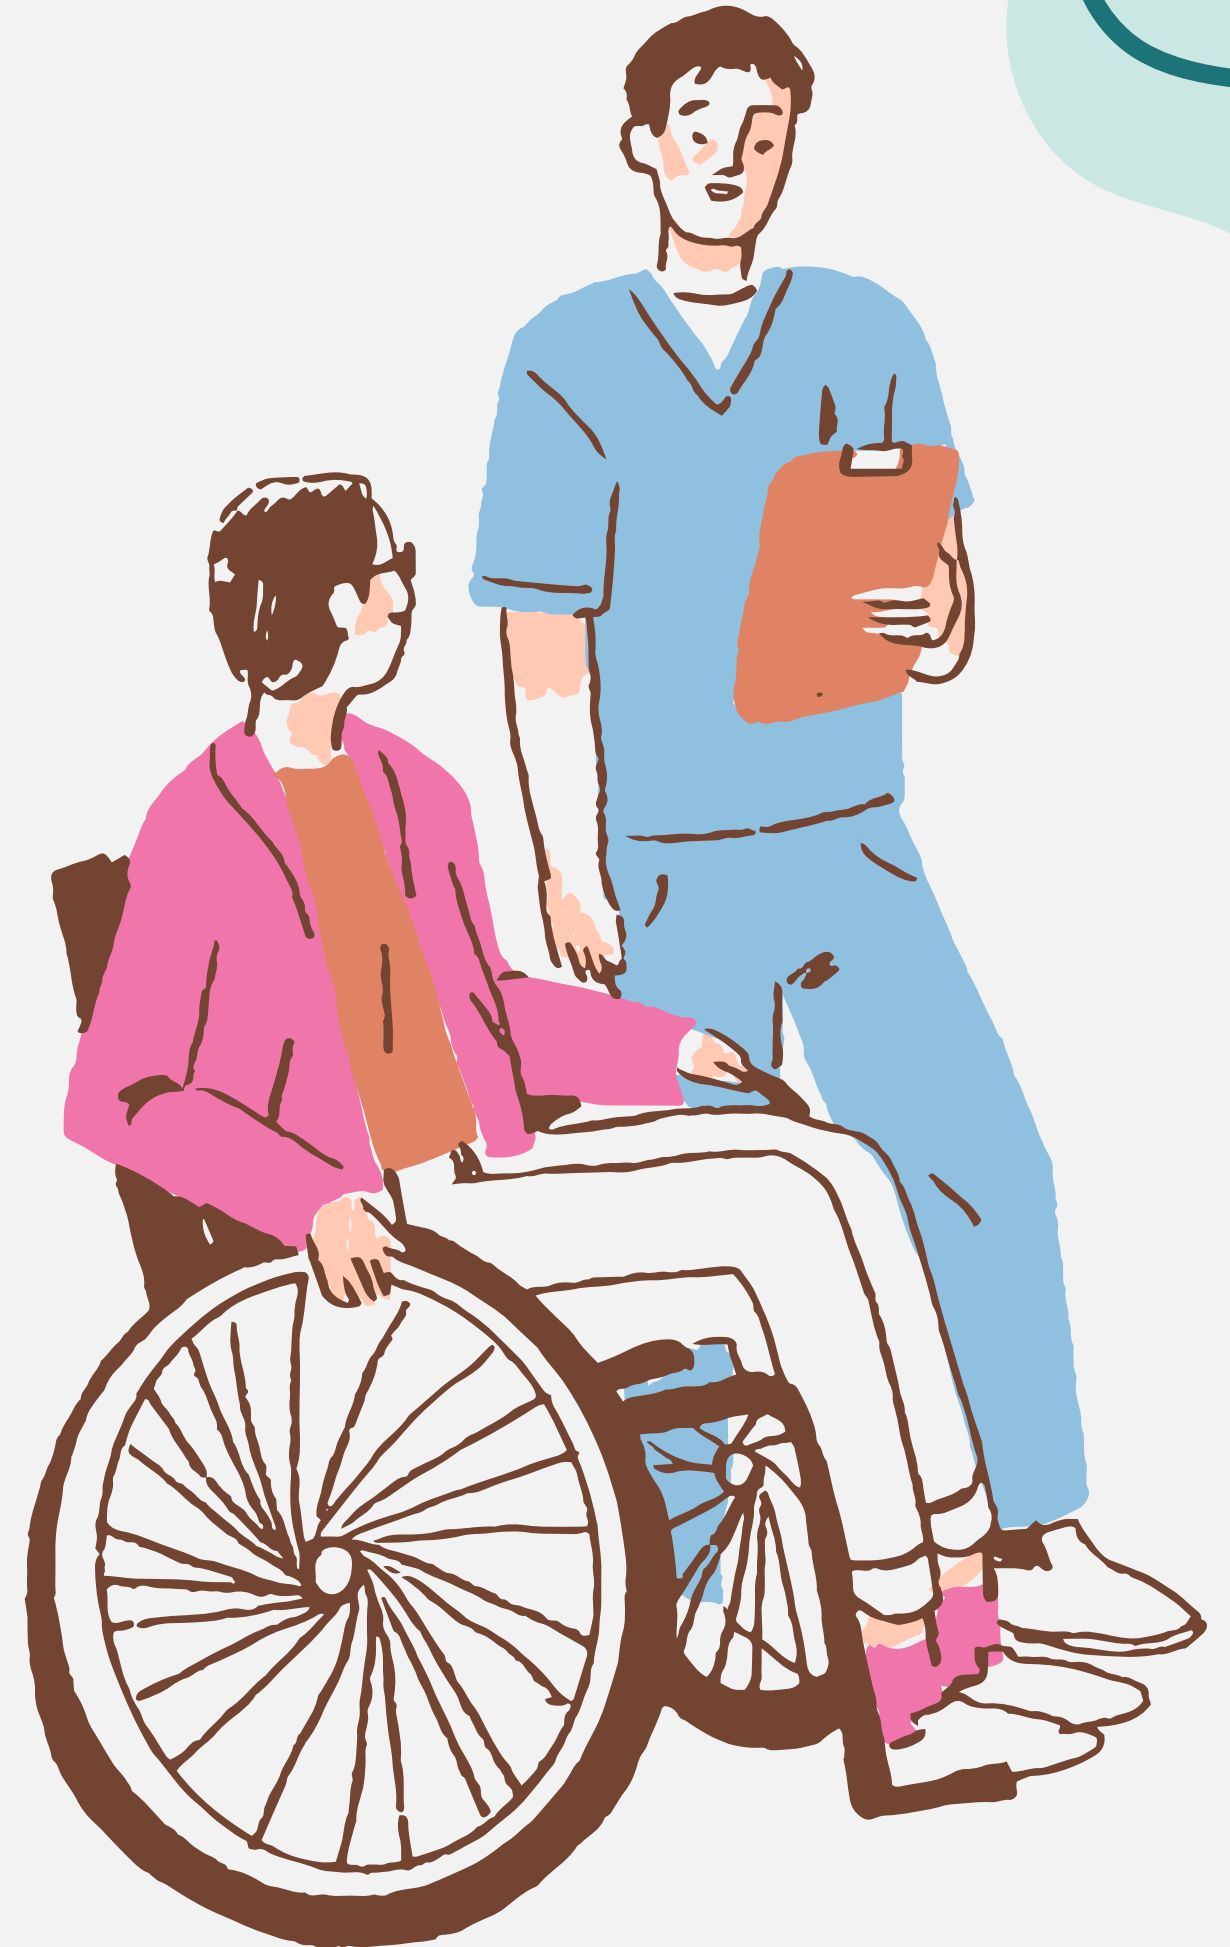

LifeLink Hub is a Healthcare app that offers many healthcare facilities.

- Issue - The difficulty for an individual to take care of their own health. Frequently failing to monitor medication consumption, making appointments, not being aware with the patient's condition, and, above all, not receiving appropriate emotional support.

TARGET AUDIENCE

- Patients and caregivers,
- Mental Health Seekers,
- Families
- Pharmacy and Lab Users
- Elderly people
- Healthcare Professionals
- General Users

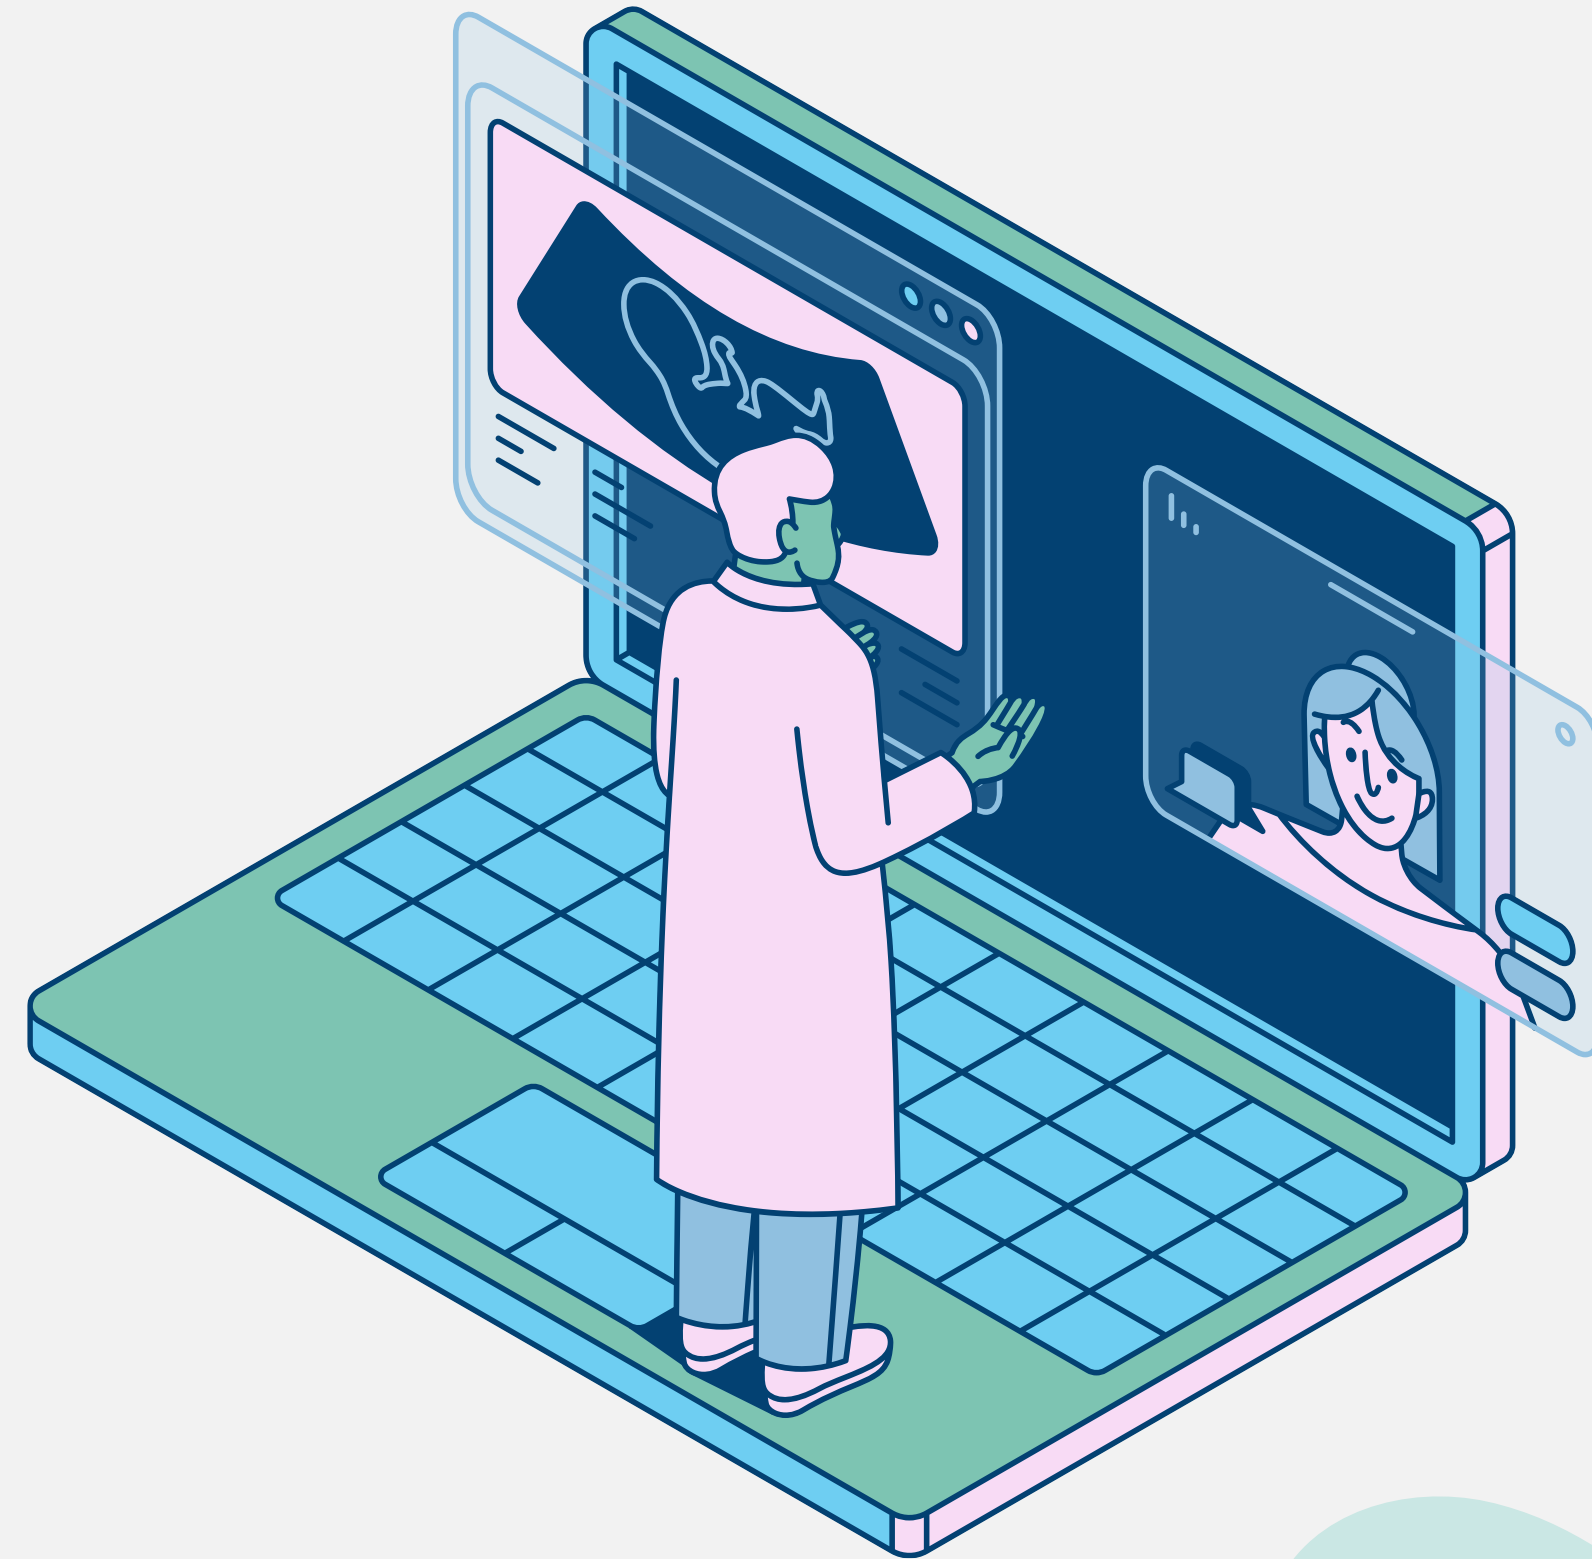

FEAUTURES

- E-channeling
- Mind Mate - AI chatbot
- Talk to Doctor Now
- Emergency
- Medication Manager
- Medication Reminder
- Medication Resources

DESIGNING AND DEVELOPING

- For Back-end Node.js was used for the server and MySQL for databse.
- For Front-end React Native Expo go was used.

CHALLENGES

- Developing the AI-chatbot.
- Delays in the developing phase.
- Providing a User freindly design.
- Quality Assurance and testing.

THANK YOU
